

HYLIFT JOHNSON LIFTERS

Muskegon • USA

Specializing in Harley-Davidson

1984 thru 1998 EVO Big Twin Lifters

OEM Stock Leakdown High Endurance Steel Body - **B2303**

.002 Oversized Steel Body (Block Saver) - **B2303 .002**

Hi-Rev Drag Racing Applications (variable duration) - **B2303R****

Slow Leak Down for the Highest Spring Pressures - **B2303S***

1998 thru 2015 Twin Cam Lifters

Stock Replacement - **B2313**

.002 Oversized Steel Body (Block Saver) - **B2313 .002**

Hi-Rev Drag Racing Applications (variable duration) - **B2313R****

Slow Leak Down for the Highest Spring Pressures - **B2313S***

Direct Oil Injection to the roller for MAX Performance - **B2313SE**

1989 thru 1998 Sportster

Stock Replacement - **B2227**

* **(S TYPE)** Lifters have a very slow leak down and will act like solid lifters maintaining full cam lift at all RPM'S. Allowing a higher RPM range, higher spring pressures and no noise!

** **(R TYPE)** Lifters have a faster than stock bleed rate and are used to allow for a better idle on performance camshafts. Note these may produce a lifter noise at low RPM.
